[Itinerary](#)

Day trip to Pyramids from Cairo airport

At the beginning of your day, you will be picked up once you reach the Egyptian lands, from the airport and you will be taken to the first spot of your tour with an AC Vehicle, with your private tour guide.

[the Giza Pyramids:](#)

One of the strangest information about the pyramids of Giza is not only their size and shape but also that if the stones of the pyramids were cut into slabs 30 cm thick, you could build a meter-high wall surrounding all of France. If it was cut into a 6 cm wide rod, a road could be built up to a quarter of the distance to the moon.

when your tour ends in the three known pyramids you will have your quad biking safari trip in the deserts of the pyramids, then go to visit.

[Dahshure:](#)

It took 14 years to build the leaning pyramid, and it seems that [Sneferu](#) did not like it, so he decided to build the red pyramid according to the experience learned by its engineers when building the leaning pyramid. So he chose the place for his pyramid in which he was buried, about 2 km north of the leaning pyramid in the town of Dahshur.

then you will have your lunch in a good restaurant with its Egyptian ingredients recipe.

then you will be taken back to your drop-off location where will be our end of service.
