The [Giza pyramids](#) are one of the most famous archeological sites in Egypt. They are a remarkable testimony to the great ancient civilizations that once lived there.

The Giza pyramids have been around for centuries, and there is still no definite answer as to how they were built. There are many theories, but without any hard evidence, it's difficult to say for sure.

There was once a Sphinx who was very difficult to understand, even for the experts.

Some archeologists believe that the face on this ancient building is that of King Khafra, and that it was built to intimidate enemies and looters.

The [Valley temple](#) is situated in a peaceful and serene valley.

The Valley Temple was built by the orders of King Khafra, and it is located inside the famed pyramids region. It is a beautiful tribute to the Pharaohs and their legacy.
